Applied science – a fresh look

The ASE's journal for science education 11-19

the Association
for Science Education

Contents

75 Making an impact with the Big Bang

Brian Fisher

Students studying physics at sixth-form level engaged in a vigorous debate, asking whether the idea of the Big Bang can be consistent with belief in a creator

81 Death Valley or bust

Andrew Carpenter

Using a new personal learning experience to develop classroom practice

91 Fungi 4 Schools – the website

David Moore

Specially produced and ready-to-use lessons and classroom activities, teacher's guides and pupils' class sheets, are among many resources available for free download from a new website

95 Using the learning company approach to allow students to investigate acids and bases

Torsten Witteck and Ingo Eilks

By means of a 'learning company', students encounter new cooperative approaches to a chemistry topic, conduct open experimentation and learn about processes in a company

103 Teachers' strategies for making effective use of datalogging

Rosemary Deaney, Sara Hennessy and Kenneth Ruthven

Four case studies from a wider research project illustrate experienced practitioners' strategies for using datalogging technology to support teaching and learning in secondary whole-class settings

113 School science and citizenship: retrospect and prospect

Edgar Jenkins

In the light of the introduction of *Twenty First Century Science*, it is illuminating to review the relationship of school science and citizenship

119 The importance of evaluation during curriculum development: the SNAB experience

Jenny Lewis and Anne Scott

In-depth evaluation of implementation during the pilot of a new and innovative advanced biology course (Salters–Nuffield Advanced Biology) allowed the developers to identify teachers' needs and design suitable support materials

128 Book reviews

138 ICT reviews
